

ABSTRACT OF THE INVENTION

The present invention is generally related to the discovery of the therapeutic benefit of administering γ -tocopherol and γ -tocopherol derivatives. More specifically, the use of γ -tocopherol and racemic LLU- α , (S)-LLU- α , or γ -tocopherol derivatives as antioxidants and nitrogen oxide scavengers which treat and prevent high blood pressure, thromboembolic disease, cardiovascular disease, cancer, natriuretic disease, the formation of neuropathological lesions, and a reduced immune system response are disclosed.
